

INTERNATIONAL EDUCATION

Shaping Tomorrow's World

Transformative International Summer School with British students and Year-round High School Integration Group programmes for international young learners

Personal Best International and The Mountbatten School

Personal Best was founded in 2011 by The Mountbatten School as its commercial arm offering premium education, sports and leisure provision across the UK. Personal Best Education has earned a reputation for excellence in its mission to help individuals, groups and organisations be the best version of themselves.

The Mountbatten School was founded in 1969 by Earl Mountbatten of Burma, second cousin to the Queen, who was once described by King Charles III as, "The grandfather I never had". He truly believed in accessibility to education for all - a value that is fundamental to both The Mountbatten School and Personal Best.

Skills for the Future

Our programmes focus on a range of essential skills, from curiosity, creativity and critical thinking to digital literacy through a variety of academic subjects. Students can also explore topics such as virtual reality, robotics and sustainability.

Collaboration with UK Students

International students collaborate with British classmates in small classes, that enhance English language skills and provide an enriching intercultural learning experience.

A Safe and Supportive Campus
Students study and stay in a safe and
supportive environment at The Mountbatten
School. Students benefit from an authentic
British secondary school experience,
focusing on academic and personal growth,
ensuring peace of mind for parents.

Award-winning Education

We bring together UK curriculum subject teachers from The Mountbatten School, which has achieved awards for its commitment to education and innovation, alongside English language specialists and summer camp experts.

The Campus

All Personal Best International Education programmes are held at The Mountbatten School in Romsey, Hampshire - an academy school located just 1 hour southwest of London. This location is easily accessible to the UK's main international airports.

Facilities

- Fully enclosed and secure site
- State-of-the-art classrooms Business style, Science and IT Labs

- Activities 20+ hrs per week
- Excursions Two full days
- Study Tours Two half days
- Insurance
- Full-board Residential Accommodation

*Please note airport transfers are not included and will incur an additional charge This course aims to inspire curiosity, foster critical thinking, and equip students with the skills they need for future studies and working life.

Morning sessions will focus on key STEM disciplines including science, technology, engineering and maths. Additionally, the programme will spotlight computer science, highlighting the critical role of coding, software development and data analysis in driving technological advancements.

In afternoon sessions, students will be introduced to business fundamentals such as marketing, finance and ethics, working together to develop a business idea and plan to present to a panel of judges.

The course aims to help young learners:

- Become responsible and successful future world citizens
- Enhance intercultural awareness and foster a sense of global identity and belonging
- Enhance awareness and knowledge of environmental and global issues threatening our planet
- Learn to communicate successfully and work collaboratively with people from all over the world
- Improve English language skills
