Personal Best International and The Mountbatten School

Personal Best was founded in 2011 by **The Mountbatten School** as its commercial arm offering premium education, sports and leisure provision across the UK. Personal Best Education has earned a reputation for excellence in its mission to help individuals, groups and organisations be the best version of themselves.

The Mountbatten School was founded in 1969 by Earl Mountbatten of Burma, second cousin to the Queen, who was once described by King Charles III as, "The grandfather I never had". He truly believed in accessibility to education for all - a value that is fundamental to both The Mountbatten School and Personal Best.

Skills for the Future

Our programmes focus on a range of essential skills, from curiosity, creativity and critical thinking to digital literacy through a variety of academic subjects. Students can also explore topics such as virtual reality, robotics and sustainability.

Collaboration with UK Students

International students collaborate with British classmates in lessons, that enhance English language skills and provide an enriching intercultural learning experience.

Why
Personal Best

A Safe and Supportive Campus

Students study and stay in a safe and supportive environment at The Mountbatten School. Students benefit from an authentic British secondary school experience, focusing on academic and personal growth, ensuring peace of mind for parents.

Award-winning Education

We bring together UK curriculum subject teachers from The Mountbatten School, which has achieved awards for its commitment to education and innovation, alongside English language specialists and summer camp experts.

THE CAMPUS

All Personal Best International Education programmes are held at The Mountbatten School in Romsey, Hampshire - an academy school located just 1 hour southwest of London. This location is easily accessible to the UK's main international airports.

This innovative programme offers international students an immersive academic and cultural experience in the UK. Students learn alongside British students, taught by expert subject specialists to develop key skills of the future.

Morning sessions focus on STEM, exploring themes including space exploration, energy, sustainability, technological innovation and digital solutions to global challenges of the future.

Afternoon sessions provide an authentic UK education experience, with international students integrated into GCSE subject lessons alongside British students. Subjects include STEM, Arts, Music, Humanities and much more, offering an insight into the UK Curriculum and learning environment.

The programme aims to help young learners:

- Develop leadership skills and become responsible global citizens
- Build intercultural awareness and a sense of global identity and belonging
- Understand environmental and global challenges
- Strengthen communication and collaboration skills
- Experience studying at a UK secondary school
- Gain insight into UK education as preparation for future study
- Improve English fluency, accuracy and confidence

SUMMER SCHOOL

Immersion Experience

A complete immersion experience with British students

Develop Coding Skills

Develop coding skills by taking control of a Mars Rover simulation for exploration of Martian terrain
